

July 12, 2012

TO THE MEMBERS OF THE UNITED STATES HOUSE OF REPRESENTATIVES:

The undersigned organizations call on Congress to pass a bipartisan STEM visa bill this year that establishes a green card program for outstanding STEM advanced degree graduates. Such a reform would allow American companies to retain many foreign students with advanced degrees in STEM fields to work in the U.S. and spur the creation and retention of high paying manufacturing and research jobs here in America.

Each year, graduate students who complete advanced degrees in science, technology, engineering and mathematics (STEM) from America's top universities are offered jobs by U.S. companies. Hiring advanced degree STEM professionals is a key to creating and retaining jobs in a variety of sectors in our innovation economy. However, skilled foreign graduates, eligible for visas, are stuck in backlogs for many years. These are highly educated professionals who will create jobs wherever they settle, whether in the U.S. or elsewhere.

A STEM visa reform would prioritize legal immigration status for those earning STEM degrees from American graduate schools, and, in fact, could increase the educational status necessary to obtain already-existing immigrant visas. The employer verification obligation would continue, as under current law, for employers to confirm that qualified American workers are not available. We applaud the work of House Judiciary Committee Chairman, Lamar Smith (R-TX) and others on the Judiciary committee to craft this type of legislation, and note that Senator John Cornyn (R-TX) has already introduced similar legislation (S. 3185) to make this change.

Our organizations appreciate the strong sustained bipartisan congressional work on this critically important issue. We also welcome the ongoing consultation by House and Senate leaders on STEM visa issues with stakeholders.

Together, the undersigned represent many American employers who hire high tech professionals, as well as American high tech employees, higher education, and trade and professional organizations. We urge Congress to work together this year to deliver this critical, timely reform of our legal immigration system – a jobs bill that would not increase the deficit.

Very Respectfully,
